

Instruction for Straw Handle Box with Gift Box Punch Board

Finished size box is 1.75 x 1.75 inches

Materials:

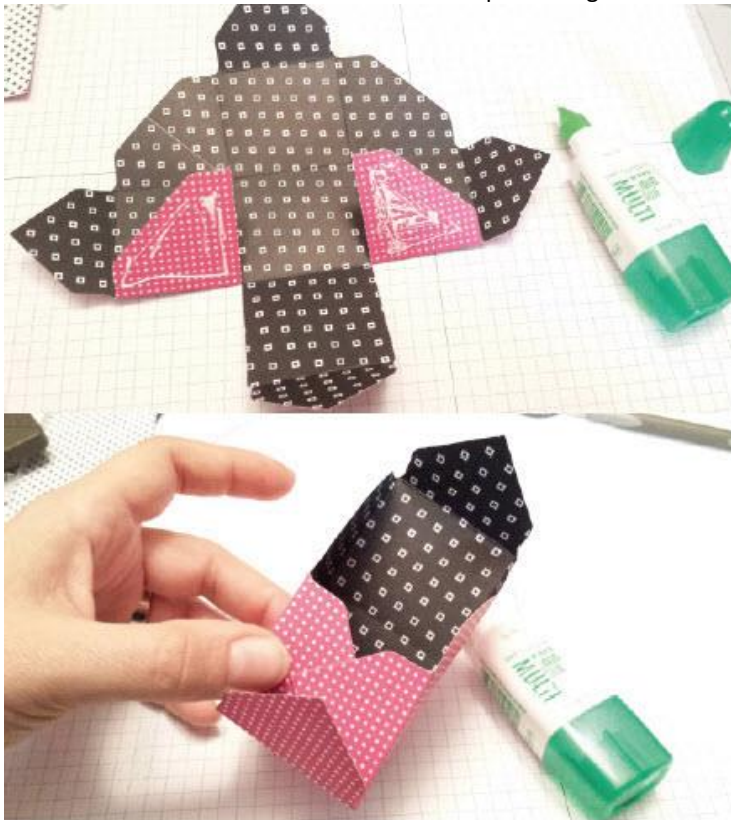

1 DSP 6x6 inches
Gift Box Punch Board
Hole Punch
Scissors
Paper Straw

Instructions:

Cut the DSP 6x6. Using the gift box punch board, punch and score using the small size score line on the Start Line. Score the diagonal score line only on 2 sides. Turning the paper, continue scoring on the small size score lines. After all 4 sides have been scored, finish punching by lining the score lines up to punch out the notches on the right sides of the paper.

Cut two slits on the bottom to create two flaps. Place glue the backside of the flaps and fold in, adhering to the now cut flap.

Tuck the top flap into the box, creating wings with the scored corners. Fold the wings up. Trim off a corner of each wing side to create symmetrical sides (into triangle shape). Punch holes in both flaps and push straw handle through the holes.
